

## EC10-43 Pressure Compensator

### DESCRIPTION

A screw-in, cartridge-style, **priority-on-demand**, pressure-compensator with a dynamic load sense, intended to provide priority flow in the required amount, while allowing excess flow to be used for auxiliary functions.

### OPERATION

With inlet flow at ③, the **EC10-43** will deliver required priority flow at ④, regardless of load pressure. Excess flow exits at ②. Port ① is the load sense port. All ports may be fully pressurized.

### FEATURES

- Hardened parts for long life.
- Quiet, modulated response.
- Industry common cavity.
