

# SOLENOID VALVES

## SV08-47A Spool, 4-Way, 3-Position, Tandem Center

### DESCRIPTION

A solenoid-operated, 4-way, 3-position, direct-acting, spool-type, tandem center, screw-in hydraulic cartridge valve.

### OPERATION

When de-energized, the **SV08-47A** blocks cylinder ports, while allowing flow from ③ to ①. When coil #1 is energized, flow is allowed from ③ to ②, and from ④ to ①. When coil #2 is energized, flow is allowed from ③ to ④, and from ② to ①.

In circuits where work port flows are unequal due to cylinder ratios, the higher return flow should be directed to port ②.

**While ① may be fully pressurized, it is not intended for use as the valve's inlet.**

Operation of Manual Override Option: To override, push the knurled knob to activate the coil #2 (S2) function; pull the knob to activate the coil #1 (S1) function.

### FEATURES

- Continuous-duty rated solenoid.
- Hardened precision spool and cage for long life.
- Optional coil voltages and terminations.
- Efficient wet-armature construction.
- All ports may be fully pressurized.
- Cartridges are voltage interchangeable.
- Unitized, molded coil design.
- Manual override option.
- Optional waterproof E-Coils rated up to IP69K.
