EC12-34 Pressure Compensator, Load Holding

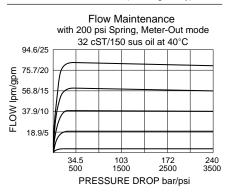

SYMBOL

USASI/ISO:

PERFORMANCE (Cartridge Only)

DESCRIPTION

A screw-in, cartridge-style, load sense, flow-on-demand pressure-compensator with built-in damping and load-holding features for use in gravity-lowering circuits.

OPERATION

The **EC12-34** is designed to be used in combination with a flow control valve for lowering and holding a load. With inlet flow at port ②, port ③ will deliver required flow regardless of load pressure at ②. Port ① of the compensator must be connected to the outlet of a flow control valve that is connected to the tank.

FEATURES

- Hardened parts for long life.
- · Hardened seat for low-leakage load-holding capability.
- Quiet, modulated response.
- · Industry common cavity.
